Salt Lake City, Utah

Dear Ms. Linner:

Sunshine Mining Company is currently planning to complete a surface drill hole approximately 1.5 miles west of Elberta, Utah next to our dispersion pond system. This area is currently covered under our present bond and the drill hole information is needed to gain approval from B.W.P.C. to use these ponds for mine dewatering. Depending upon drill results this hole may be developed into a monitoring well for future ground water testing at this site.

The legal description for this drill hole is the NE 1/4, Section 18, T.10S., R.2W., S.L.B.M.

If you have any questions or require any further information please advise.

Very truly yours,

Glenn M. Mellor
